

Happy Trails

Project 1 Contributors

- *Donovan - Victoria - Kendra - Aman*

Elevator Pitch

- Have you been in isolation too long & maybe want to escape & venture into the wild?
 - Or you need a new place to walk your dog?
-
- You want to see where your area trails are & want to find out the weather for that location?
 - Happy Traislis the website that delivers on both.

1. Concepts

To motivation for making this website is for people to go outside and try find some fun and peaceful activities in these difficult times with everything going on these days it's nice to get a break from it all. Also since it's getting close to winter it's very helpful to see what the temperature will be especially in Kansas.

Creating the site:

- Materialized CSS
- Illustrator
- Photoshop
- JQuery
- API's (2)
 - Hiking Project (Aman)
 - Weather Stack (Victoria)

Roles: Donovan & Kendra (myself) worked on the HTML/styling.

Victoria & Aman split the api's and rendered the card to display the data.

Challenges: Conflicts with pulls & pushes & informing group of changes to avoid conflicts in out develop branch.

Future Goals -

- In the future our would designate each person's role more defined.
- Create a KanBan to break up the task.
- Participate & attend stand-up meetings
- Communicate better in Slack.
